

ADDING FURNITURE AND FIXTURES IN AUTOCAD

AutoCAD has pre-drawn objects including furniture and typical house fixtures like tables, sinks, and toilets. You can access those by using the following steps:

1. Open the “Tools” pull-down menu.
2. Choose “Palettes”.
3. From the next menu, choose “Design Center”.
4. You will be given a list of folders. If the “Design Center” folder is not open, double click on it.
5. Double click on one of the following options. Each option contains a different set of objects.
 - a. House Designer
 - b. Home – Space Planner
 - c. Kitchens
 - d. Landscaping
6. Click on “Blocks”.
7. Click and drag an object into the drawing.
